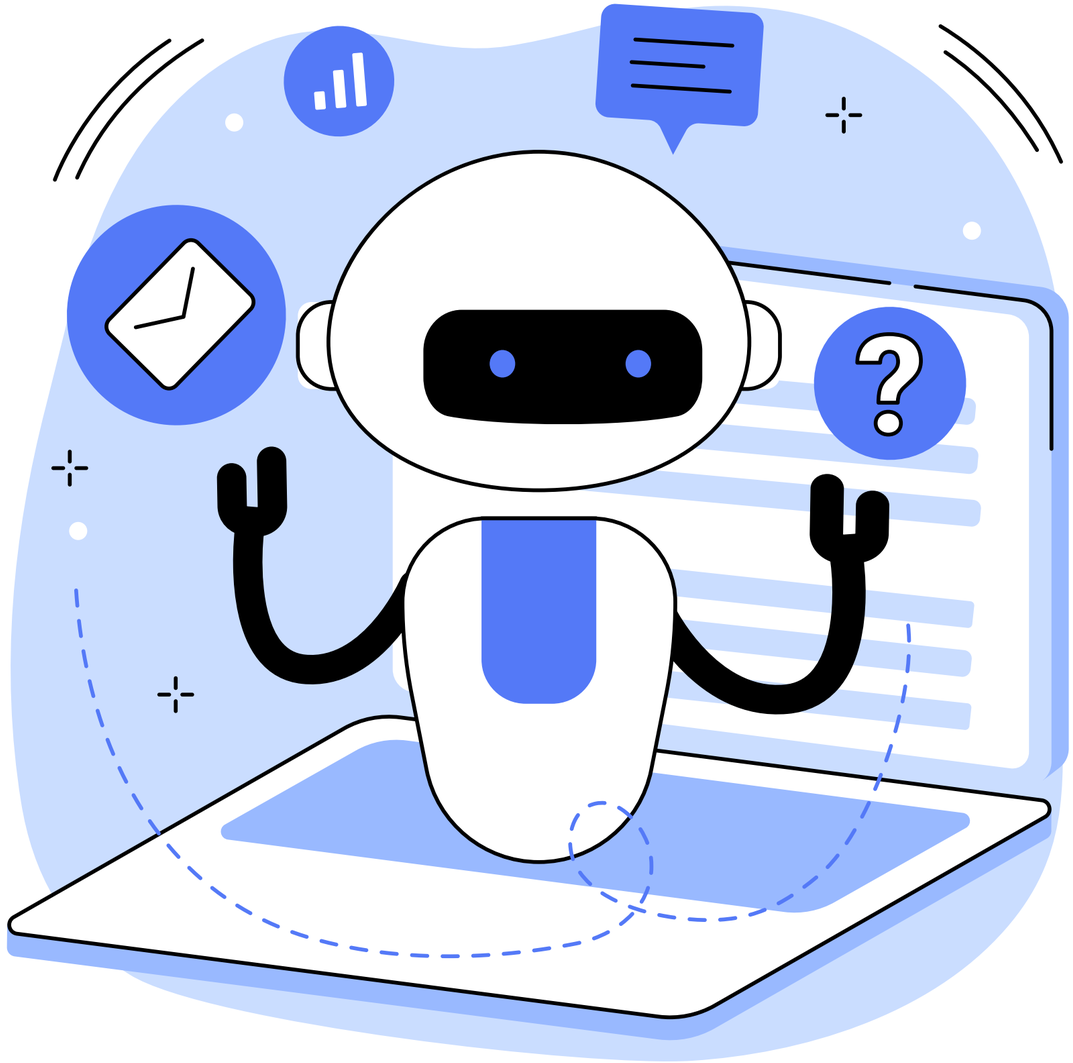
ARTIFICIAL INTELLIGENCE

A Free Resource Challenge

ARTIFICIAL INTELLIGENCE

We're on the cusp of an **AI revolution**, and each one of you holds the key to innovative solutions that could reshape the future. Dive deep into these challenges, brainstorm, discuss with your colleagues, and let's unlock the full potential of AI together!



OBJECTIVES

Learn the basics of AI

Experiment with AI tools

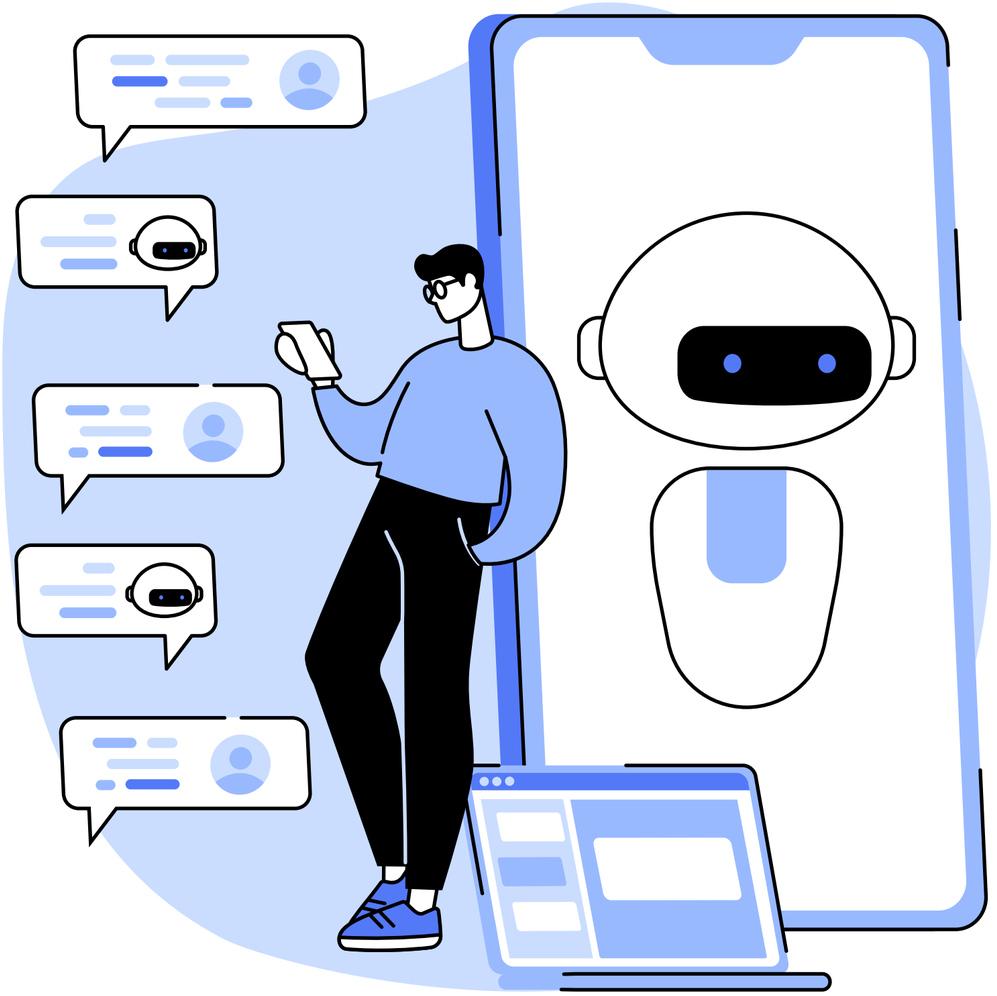
Compare notes

LEARN THE BASICS OF AI

Key Result 1: watch an introductory AI course. YouTube videos.

Key Result 2: Read a book or white paper about AI. One that helped me early on and that I've shared with a handful of people is The ChatGPT Millionaire by Neil Dagger.

Key Result 3: Attend an AI online workshop or conference. I've done a few online workshops about AI that have been okay, but honestly if you've done KR1 and/or KR2, you're ready to dive into Experimentation



EXPERIMENT WITH AI TOOLS

Key Result 1: Sign up for at least 2 AI tools. ChatGPT, Google Bard, Bing, Pi, etc.

Key Result 2: Enter at least 10 prompts per week for 1 month. I recommend putting the same prompts in both tools you're experimenting with to see differences/similarities in the responses you get.

Great platform to use:
https://www.dariuslukas.academy/login

COMPARE NOTES

Key Result 1: Share to the team what you're learning when we meet.

Key Result 2: Talk to at least two other people about this each month. Share what you're learning with your peers. Not just in your department but how are other departments using AI?
Be curious. Ask questions to ChatGPT, etc.
Keep learning!

THANK YOU FOR LEARNING MORE ABOUT AI!
