OBJECTIVE

The SU Forensic Science Camp is a day camp designed to give middle school students entering 7th to 9th grade the opportunity to perform a variety of forensic investigations designed to teach basic principles and to use these techniques to study a crime scene. We will spend the majority of our time in crime scenes and laboratories so students can truly experience what it is like to be a forensic scientist.

CONTENT

The Forensic Science Camp will simultaneously emphasize the fundamental concepts of forensic science (evidence collection and documentation, fingerprint collection and analysis, shoe print and tire impressions, ballistics, serology, and analysis of controlled substances) and how those concepts are used to solve criminal cases. We will emphasize safe and proper laboratory analysis and interpretation of results as the primary method of instruction.

A typical day at Forensic Camp will include hands-on experiences. The Cumberland County Forensic Team will be instructors for both days at camp. Campers will have the opportunity to work hands on with equipment regularly used by the county CSI team members and forensic laboratory personnel.

QUALIFICATIONS

Participants need no prior experience with forensic science to join this camp. Applicants must be entering 7th to 9th grade to qualify for this camp. There will be adult themed conversations and sensitive photos viewed. Please consider the maturity of the camper prior to registration. You must also be able to provide your own transportation to and from Franklin Science Center (FSC) at Shippensburg University.
ABOUT THE DIRECTOR

Dr. Robin McCann is a chemistry professor at Shippensburg University and Director of Toxicology at the Cumberland County Forensic Laboratory. Kristen McGough is a forensic scientist working in the controlled substances section of the laboratory. Carol McCandless is a forensic scientist working in the latent print section of the laboratory and is the lead forensic investigator for crime scenes. Karen Crawford is a forensic scientist working in the toxicology section of the laboratory. Rhonda Hirschl is a forensic scientist working in the chemistry section of the laboratory. Alyssa Coldsmith is a forensic technician working in the evidence intake section of the laboratory. All members of this team are also trained forensic investigators that assist with processing evidence at crime scenes.
