Greetings, and Welcome to an Exciting New Year at SU!

A special welcome to you, if this is your first semester, we are happy to have you aboard!

Charting Your Academic Course: A Guidebook for Undergraduate Students is a great resource for you and your academic advisor, and will be especially useful to help you prepare for your meetings with your advisor. This guidebook is for you to keep and use!

In these pages, you will find answers to many of the questions you may have about academic programs and a myriad other topics such as:

- Important university policy information (page 11)
- General Education requirements (page 39)
- Explanations of placement testing and modern language requirements (page 19)
- Information about programs such as Study Abroad and the Honors Program (page 23)
- Requirements for declaring all majors offered here at SHIP (pages 33-35)
- Details of all programs of study, including registration tips, and prerequisites (49)

We wish you a very happy and successful year, and know that you will find Charting Your Academic Course: A Guidebook for Undergraduate Students informative and helpful!

Sincerely,

Denise Yarwood, Associate Dean,
The Elnetta G. Jones School of Academic Programs & Services, and Office for Exploratory Studies

Academic Policies and Procedures

Developmental Courses
Developmental courses do not meet the general education program requirements. They are considered additive credits and do not count toward graduation. The following courses are considered developmental:

- Developmental Mathematics (MAT 050)
- College Reading & Study Skills (RDG 050)

*For more information on Placement Testing and Developmental Courses, please see "Understanding Placement Testing", p.19.*

First Day Attendance
Failure to attend the initial class session may result in a student being dropped from the course. If you are unable to attend the first class session of a course in which you plan to remain enrolled, you must give notice of the intended absence to the instructor, department secretary, or academic dean's office of that course. Failure to provide such notification may result in your name being removed from the roster and your place in that class being given to another. If you do not attend the first day of class, you cannot assume, however, that you have been dropped from this class. It is your responsibility to verify your enrollment status by checking your schedule on the Student Information System. Exploratory students should contact their dean's office (Horton Hall 112, x1395).

Transfer Courses
If you want a course taken at another school to count towards your degree at Shippensburg University, you must obtain permission from the dean of your college before taking the course. Transfer course credit cannot be guaranteed for students who fail to communicate their intentions to their dean prior to taking the course.

Withdrawal from a Class
First-year students cannot adjust their schedules except through their dean's office. The schedule adjustment period (at the beginning of the semester) lasts for approximately five (5) days. During this time, a student can withdraw from a course and there will be no record of this course on his/her transcript. Students may withdraw from a class through the tenth week of the semester by initiating a request through their academic dean. In this case, a “W” grade will appear on the transcript. However, withdrawals after the tenth week will result in an “F” grade recorded on the transcript. You should check with your advisor and the Financial Aid Office before withdrawing from a course. It is your responsibility to officially withdraw from any class into which you have been scheduled whether or not you have ever attended the class.

Minimum Academic Standards
You are expected to maintain satisfactory academic standing, which requires a cumulative QPA of 2.0 (“C”) or better in your total program of courses and a minimum of 2.0 (“C”) in the coursework of your major area of specialization. You cannot declare or change majors without at least a 2.0. To avoid dismissal, first-year students should maintain a minimum QPA of 2.0 or above.

Repeating Classes
Students who have “D” or “F” grades and who are on academic probation should repeat the courses with “F” grades as soon as possible. This is the fastest way for students to get off academic probation. Although the initial grade will continue to appear on the transcript, it will no longer be calculated into the grade point average. Per university policy, a “D” or “F” grade earned at Shippensburg University may not be made up or replaced by credits earned at another institution.

Shippensburg University policy allows a student to repeat (and replace) six grades with a newer grade; however, after this option is used six times, any subsequent repeats will include both grades in the grade point average. Always check with Financial Aid, a coach, or advisor before repeating a course.

How many courses do students take in the first year?
It is advisable that most first-year students take five courses (15 credits) each semester of their first year. There are times, however, when a student may be encouraged to take four courses (12 credits). Reduced loads may be desirable for students who participate in one or more sports, students on academic probation, students who have learning difficulties, or students who work. Students can schedule a maximum of 18 credits without incurring additional fees.

When do I register for classes?
Most students register for classes at Orientation. For the first semester, students take general education courses necessary for graduation. After the first semester, students continue to register for their own classes via their student portal, once they have consulted with their academic advisors.
Frequently Asked Questions
Quick Answers to Common Questions

What happens if I take only three courses (9 credits)?
A student who carries fewer than 12 credits is a part-time student. This part-time status could reduce the student’s financial aid package because financial aid awards are based on an “assumed” full-time enrollment—12 or more credits. In addition, a student must pass 24 credits from one September to the next, attaining a grade point average of no less than 1.7 for first-year students and a 2.0 for sophomores and upperclassmen. The NCAA also follows these guidelines.

What happens if I become ill and cannot complete the semester’s coursework?
Students may request a medical withdrawal from the university with a “W” grade in their coursework, or they may request an “I” grade (incomplete). This request is made through the dean’s office and is possible if 1) the student was enrolled in the university for the majority of the semester; and 2) the documentation of the medical condition warrants a medical withdrawal.

Is class attendance mandatory?
It depends. Students must understand the attendance policy of each of their instructors, every semester. Some professors don’t take attendance and others deduct points for missed classes. Professors will often present material in class that won’t be found in textbooks, and it’s up to the student to obtain that information. There is a very high correlation between class attendance and academic success.

What if I am late for class?
Sometimes circumstances will prevent a student from attending class on time. But being habitually late to class is both rude and inconsiderate. In addition, some professors deduct points for lateness. Good students come to class on time and well prepared.

What grade point average will place me on academic probation?
To remain in good academic standing, a student must maintain a minimum cumulative grade point average of 2.0 (“C”).

Can I take courses at another university to improve their grade point average?
See Visiting Student Program (11-13 Catalog, pg 25) No. Only credits, not grades, will be accepted from other institutions. Also, only courses in which a “C” grade or higher was earned will transfer. Approval for transfer credit should be obtained from the academic dean’s office prior to enrolling for the course.

If I earn a “D” or an “F” grade in a course at Shippensburg University, can I repeat it at another university?
“D” and “F” grades earned at Shippensburg must be repeated at Shippensburg.

Should I always repeat courses when I have earned “D” or “F” grades?
Not always. It depends on the student’s major. However, it is strongly recommended that students who want to improve their grade point average should repeat the course as soon as possible. Shippensburg University’s policy allows a student to repeat (and replace) six grades with the newer grade; however, after this option is used six times, any subsequent repeats will include both grades in the grade point average. Check with Financial Aid or your advisor before repeating courses.

Will I receive any recognition for outstanding academic performance?
Yes. A dean’s list is published at the end of each semester to recognize students who earn at least a 3.5 or better. In addition, students who consistently perform at the highest levels are given special recognition at the end of each academic year.

How much time should I devote to study?
It is important for first-year students to learn early in their collegiate career that efficient time budgeting requires painstaking systematic planning. The resulting time schedule must be both realistic and practical; that is, it must be sufficiently flexible to handle changing requirements and be adequately balanced between academic work and recreation. Studies show that college students who are taking five (5) courses should study at least 30 hours a week outside of the classroom in order to be academically successful.

Where should I go for academic advice?
Every student is assigned to an academic advisor either by the department of the student’s major. If you an Exploratory Studies student, you will be assigned an advisor from the Advising Center for Exploratory Students in the Office for Exploratory Studies. Students who do not know their assigned advisor should contact the appropriate department or the Office of Exploratory Studies, or should access their myShip portal.
When are Exploratory Studies students required to declare a major?

Exploratory Studies students must declare a major early in the third semester of their collegiate career. This will allow you to schedule courses in your major for the second semester of their sophomore year.

What steps must I follow to declare a major?

Declaring a major is a simple process. You should follow these steps:

1. Make sure you are in good academic standing. In all cases, students need a minimum cumulative GPA of at least a 2.0.
2. Talk to your advisor about your plans.
3. Verify requirements for the major in the Guidebook for Advising Undergraduate Students.
4. If the selected major is among the list of high demand majors (Biology, Comm./Journalism, Psychology, and Teacher Education), students must apply to the department within the first three weeks of each semester. These majors have higher GPA standards. Some departments conduct pre-screenings. They may also require completion of certain courses before students will be considered and accepted as majors.

Please note, although these majors only accept students within the first three weeks of every semester, eligible students may declare other majors any time during the semester (except during registration). If you meet the major requirements, you should complete the online form at ship.edu/registrar. Click submit, then print the form and take it to the department Chair and new college dean for their signatures. Once signatures have been obtained, the form will be sent to the Registrar’s Office for processing.

What are minors?

An academic minor is a structured group of courses that can enhance your educational experience. It usually consists of 18-26 credits from one or more disciplines outside the student’s major. It is possible to have more than one minor, but only six credits from one minor may count toward the fulfillment of another. Shippensburg University offers over 30 different minors. Students should consult the catalog for details and consult with their advisor about declaring a minor.

Who is eligible for the Satisfactory/Unsatisfactory option?

Students who have completed thirty (30) or more credit hours with a minimum overall grade point average of 2.5 may schedule one course (three or four credits) per semester outside of the major or minor field of study under the Satisfactory/Unsatisfactory option. The maximum number of credits a student may schedule under the option is ten (10) credits. To apply for this option, an original copy of the student’s class schedule must be presented to the Registrar’s Office within the first two weeks of the semester.

Must I take a foreign language?

It depends. Only students who expect to graduate with a B.A. (Bachelor of Arts) degree need to complete three credits of a foreign language at the intermediate level (103 level). B.S. (Bachelor of Science), B.S.B.A. (Bachelor of Science in Business Administration), B.S.Ed. (Bachelor of Science in Education), and B.S.W. (Bachelor of Social Work) students do not need to take a foreign language.

Students who have completed three years of a single language in high school have satisfied the language requirement. You may take a foreign language course to fulfill a Category B Humanities requirement for general education.
UNDERSTANDING PLACEMENT TESTING

Q. How do I know if I need to take placement testing?
A. Placement Testing is based on your SAT scores:

Reading:
Depending on your SAT score, **you may be required to complete a developmental reading course (RDG 050) your first semester.**

Q. Can I test out of remediation?
A. You may have the opportunity to take the Townsend Press College Preparatory Reading Test, depending on your SAT score.

- A TP Reading Test score of 80 or above, is passing, and you will not be required to take Developmental Reading (RDG 050).
- A TP Reading Test score of below 79 will require placement into RDG 050
- You will automatically be placed into RDG 050 if you **do not** choose to complete the Townsend Press College Preparatory Reading Test.

You are encouraged to complete remedial courses **prior to arriving at Shippensburg University**; otherwise:

- You must take RDG 050 in your **first** semester at Ship.
- Your first semester schedule will be restricted to 12 credits total (including RDG 050).
- The developmental course will **not** count towards the credits required for graduation.
- You are not permitted to take HIS 105 or 106 until RDG 050 is successfully completed.

Math:
Depending on your SAT score, **you may be required to take the Accuplacer Math Placement Test.**

You may automatically place into Level 4 Math, depending on your SAT score. Students in STEM, Business, and Mid-Education Majors are encouraged to complete the Optional Math Testing to advance their level.

You may automatically place into Level 6 math, depending on your SAT score.

Q. So what Math Course Should I Take?
A. **You should always check with your advisor before scheduling math courses,** but the table, below, provides a guide.

**Transfer Students:**

Q. I am a transfer student. Do I need to complete placement testing?

A. **You will be contacted by the Placement Testing Office if testing is required**; however, as a guide, you will need to take placement tests in math and English under the following conditions:

- SAT scores
- Your SAT scores are **older than 2 years**.
- You are **not transferring in a math and/or English course**.
- You did **not successfully pass a math or English developmental course**.
- You do **not have a math or English course “pending” or in “process”**.

### Notes:

1. MAT050 credits count towards full-time status and GPA but not towards graduation.

2. MAT140A is a slower-paced (4-credit) version of MAT140B. Students who pass MAT050 must take MAT140A, not MAT140B. Students should only take one of MAT140A and MAT140B, not both.

3. A “STEM major” is any major that requires MAT211 Calculus I. These include Applied Physics, Biology, Chemistry, Computer Engineering, Computer Science, Electrical Engineering, Geoenvironmental Studies, Mathematics, Physics, Software Engineering. Elementary/Middle Level Education and Economics majors with a mathematics concentration are also in this category.

4. MAT110 Fundamentals of Mathematics I is only available to Education majors.

5. Quantitatively-minded students in majors that require MAT117 Applied Statistics and who place at level 5 or higher may be encouraged to consider MAT217 Statistics I instead.

6. Economics majors (non-Mathematics concentration) are also in this category.
Modern Language Requirements for B.A. Degree Programs

Shippensburg University believes all students who major in a B.A. (Bachelor of Arts) degree should have some "Novice" foreign language background. This requirement can be satisfied by completing a language class at the 103 (intermediate) level or by completing three years of any one foreign language in high school.

Students who major in B.S.B.A. (business) degree programs, B.S.Ed. (education) degree programs, B.S. (Bachelor of Science) degree program, or B.S.W. (Social Work) degree programs are not required to complete the foreign language competency. Students are encouraged to use the following guidelines when considering study in a foreign language: Students with three or more years of a language, who want to take the same language as a General Education Category B course, will be placed at the 202/204 level, according to their number of high school years in one language.

Students may also meet this requirement through AP testing or CLEP testing, or the university placement test combined with the department oral test.

Students who major in B.S.B.A. (Business) degree programs, B.S.Ed. (Education) degree programs, B.S. (Bachelor of Science) degree programs or B.S.W. (Bachelor of Social Work) degree programs are not required to complete the foreign language requirement.

Students are encouraged to use the following guidelines when considering study in a foreign language:

**LANGUAGE PLACEMENT**

Students with no previous knowledge of a foreign language must begin with the introductory level (101) and complete three courses in that language.

Students with one year of a language should be advised to take the 102 level of that language.

Students with two years of a language should be advised to take the 103 level of that language.

The Modern Languages Department has a placement plan designed for students who already have some knowledge of Spanish, French, or German and want to take upper-level courses or to receive credit by examination for certain courses. Please contact the department chair for placement in these courses.

A placement table for all languages is provided below:

Study Abroad at Shippensburg University

Study Abroad at Shippensburg University: Plan Now to Study Abroad

One of the advantages of attending Shippensburg University is the ease with which you can study abroad. New friends and experiences await you in Australia, Costa Rica, England, France, Ireland, Spain, New Zealand, and elsewhere across the world.

Why plan now to study abroad? Some advance planning is necessary in terms of courses you take here and courses you reserve for studying abroad. General Education courses work really well abroad. A very good reason to study in Denmark, The Netherlands, Mexico, Korea or wherever is so that you can take courses unique to that region. Many courses in your major may be taken abroad as well. Language students find it is essential for them to study their language in the native region.

What are the requirements? You need a minimum 2.5 GPA, although many institutions have requirements beyond this. SU also requires students to earn 30 SU credits before going abroad and to be in good standing at the university. All schools and programs require that you complete one year of college before going abroad. You can apply after your first semester, but you must finish one year here before you can travel abroad.

When do students study abroad? Study abroad used to mean one semester during your junior year of college. Today, students can chose a timeframe that works with their college career. Semester-long programs are most popular, but some students select an academic year (actually 8 months or so) because they find one semester is not enough. Spending two semesters abroad enables you to reap all the benefits of the program. It also gives you more time to travel and to make friends. For those unable to spend a semester or a year abroad, summer programs are also available. These programs can last for 3, 6 or even 9 weeks.

How much will it cost? The cost of studying abroad varies depending upon location. There are also exchange programs for particular majors, where you pay tuition here and study elsewhere. Special scholarships are available for those who qualify, and nearly all financial aid can be applied to studying abroad. It is open to all majors, credit transfer is guaranteed in advance, and it will not delay your graduation if you plan accordingly.

How do I get started? Please call 477-1279 or stop by the International Programs Office in the Cedia Union Building, Room 221 and schedule an appointment. Information is also online at www.ship.edu/international.

Think in terms of when, where, your budget, and your GPA. We will find programs and courses suitable to your needs. In this ever-changing, interdependent world, there is a growing need for future teachers, employees, and leaders to understand other peoples, languages, and cultures. Check out the challenge and adventure of studying abroad.
The University Honors Program

The University Honors Program involves students of all majors and at all class levels. To earn the University Honors Program designation with their degree, students complete at least 36 Honors credits, maintain a 3.25 QPA overall and in their Honors courses, and fulfill the program's participation requirement. The program's credit requirements may be prorated for students who enter the Honors Program after the first semester of their freshmen year. The 36 Honors credits are distributed as follows:

1. Eight Honors courses in General Education, 24 credits: Honors students are required to complete HON 106: Honors Writing Intensive First-Year Seminar (unless they have earned AP or transfer credit for the course) and at least 7 other Honors General Education courses. The Honors Program offers approximately 6-8 Honors courses in General Education each semester, representing a cross-section of the General Education requirements. Most Honors courses correspond to regularly offered General Education courses. For example, HON 122: Honors World History I is equivalent to HIS 105: Historical Foundation of Global Cultures. Some Honors courses may not correspond to regularly offered General Education courses, yet they can fill General Education requirements. Students usually complete most of their Honors courses in General Education during their freshman and sophomore years.

2. Three 300-level Honors seminars, 9 credits: Students may begin taking Honors seminars during their sophomore year. Honors seminars offerings include:
   a. Interdisciplinary seminars: These seminars focus on interdisciplinary explorations of specific topics, and they emphasize interdisciplinary analysis and problem-solving.
   b. Core seminars: Some core courses for business and education majors are regularly offered as Honors seminars, including EEC 273: Introduction to Exceptionalities and MGT 447: Business and Society.

   Undergraduate research beyond the capstone project may be substituted for one or more Honors seminars.

3. One Honors capstone project, 3 credits: The University Honors Program's capstone project is a major independent research, creative, or service-learning project. Students usually complete the Honors capstone project and present the results of their project at the University Honors Symposium during their senior year. To mark their progress, students submit Honors capstone project forms, which are available on the Honors Program website at http://www.ship.edu/honors. Options for completing the capstone include:
   a. HON 396: University Honors Colloquium: The University Honors Colloquium explores a theme, and students undertake a research and/or service-learning project on the theme.
   b. Independent research, creative, or service learning project: Students register for research or independent study credit and undertake a research, creative, or service-learning project under the direction of a faculty mentor.
   c. Internship with a related research project: Students register for internship credit, and their faculty supervisor oversees their research project.
   d. Student teaching experience with a related research project: Students register for student teaching credit, and their faculty supervisor oversees their research project.

For more information about the University Honors Program, please visit our website, www.ship.edu/honors, or contact the Director of the Honors Program, Dr. Kim Klein, at kmklei@ship.edu or 477-1604.
Turning Academic Probation into Success

Many faculty who work with students on academic probation find that those who are later dismissed for poor academic performance have often made some common mistakes. If you find yourself on academic probation, you will be less likely to face dismissal, and more likely to increase your GPA, by engaging in the following proactive behaviors:

**Withdraw from courses within the appropriate timeframe.**

Students cannot withdraw from courses past the established deadline. Except for medical emergencies, the last day to drop a course with a “W” occurs during the tenth week of the semester. The deadline is always advertised widely on campus each semester through the deans’ and department offices, as well as on the SHIP website. If absolutely necessary, consider withdrawing from a course only within the established period, and only after discussing your intention with your professor and academic advisor.

**Repeat courses in which you earn “F” grades.**

Students tend to think they can put off repeating “F” grade courses until the summer session. Unfortunately, if your grades are poor in the second semester, the opportunity to register for summer classes may not be available. Your best course of action is to repeat “F” grade courses as soon as possible. Remember you may only repeat these at SHIP.

**Follow the advice of your advisor - not a friend.**

Friends may have good intentions, but they sometimes misadvise their peers about courses that are easy and appropriate for some, but difficult and inappropriate for others. Thus, you should place only limited faith in course selections suggested by friends. Your academic advisor or a departmental faculty member is a far better resource.

**Seek academic or personal help early in the semester.**

Some students try to succeed on their own and seek help only when the situation becomes particularly grim. This is not the time to be self-reliant; instead, please know there is help available on campus. Using supportive services is expected and encouraged as part of the total academic experience.

**Consider your course load.**

Students on academic probation sometimes benefit from taking fewer credits. After discussing with your advisor, consider taking just 12 credits in your first semester on academic probation. So you stay on track for graduation within four years, remember you can make up the missed credits during winter or summer terms.

**Speak to a Librarian.**

Students taking courses that require research for projects, papers, or speeches often believe they know how to find the information they need. What you may not realize is that your professors’ expectations may be higher than you have been used to, prior to college. In addition to providing library instruction sessions in a wide range of courses, librarians are available at various times throughout the week for one-on-one consultations that will help you build on the skills you need to be successful at college-level research. Asking for help at the beginning of an assignment can save you time that might be required in redoing assignments and help you earn a better grade!

Department Internship Coordinators

Experiential learning is one of the education cornerstones at Shippensburg University. Students are strongly encouraged and, in some programs, required to gain practical work experience directly related to their major. In addition to student teaching internships, practicums, field experiences, and internships are offered by all three colleges. Even though the administration and coordination of experiential learning is decentralized across the university, the requirements and expectations of both students and employers remain fairly consistent.

Students gain professional experience directly related to their major by working part-time or full-time during the fall, spring, or summer semesters. Students earn credit based upon the number of hours worked; they are supervised by both a faculty advisor and an employer. Common components of internship programs across campus include: faculty approval of the internship position; faculty site visit or contact with both employer and student during the internship; and definition of educational goals in written agreements between faculty, employers, and students. Students are expected to complete various academic assignments related to their experience. Evaluations by both students and employers also help determine whether educational goals were met. For more information, please contact the relevant department and see http://www.ship.edu/intern/index.html.

**Minors**

Adding a minor to your program of study is an excellent way to broaden your background and increase your employability. The following minors are offered at Shippensburg University. Consult your academic advisor, the department, or the web at [www.ship.edu/academics/programs/ugrad.html](http://www.ship.edu/academics/programs/ugrad.html) for more details. You can also refer to the college catalog for the courses that constitute the minor.

Academic Planning for Career Success

**FIRST YEAR**

___ Do well academically—the higher your GPA, the more choices you’ll have.

___ Consider college your first job—and as preparation for life.

___ Take at least three self-assessments to discover your values, skills, and goals.

___ Evaluate and discuss what you discover about yourself with your advisor, counselor, mentor, or faculty member.

___ Explore and use the resources available on campus (including human resources).

___ Use the GenEd courses to determine your likes and dislikes.

___ Start a portfolio of your best work.

___ Attend a university open house.

___ Begin to develop/improve your leadership/organizational skills through moderate involvement in constructive extracurricular activities (2nd semester).

___ Adopt a mentor.

___ Begin a career file. Keep a file of all interesting careers you read or hear about.

___ Cultivate skills that will enable you to adapt to change.

___ Analytical/critical thinking
   ___ verbal and oral communication
   ___ computer proficiency
   ___ leadership
   ___ teamsmanship (organizational skills)

___ Know and understand your academic options.

___ Become familiar with Internet resources.

___ Refine possible majors into two or three options.

___ Talk to alumni who work in fields that interest you about their undergraduate and career experiences.

**SECOND YEAR**

___ Do well academically.

___ Continue to explore academics, the world of work—and yourself.

___ If you haven't already done so, choose your major!

___ Explore career alternatives within your major.

___ Cultivate key campus career contacts and network among them.

___ Develop a tentative resume; as time passes, refine it.

___ Track trends in the World of Work.

___ Develop those adaptable skills (see first-year).

___ Obtain a quality internship over the summer.

___ Consider foreign study for a summer/semester.

___ Obtain relevant employment, if possible.
Academic Planning (continued)

JUNIOR YEAR

___ Do well academically.

___ Visit the Career Development Center periodically to check for relevant workshops, job fairs, and on-campus recruiting visits, etc.

___ Attend a workshop on the practice of interviewing.

___ Continue to research the workplace. Consult with as many experts as you can.

___ Refine your leadership/organizational skills in campus activities.

___ Refine your resume and portfolio.

___ Explore different internship opportunities.

___ Investigate graduate school.

___ Keep contact with key campus professionals (advisor, mentor, career personnel).

___ Consider foreign study for a semester.

___ Do public service work.

___ Attend job fairs for experience and knowledge.

___ Join at least one professional association to make appropriate contacts.

___ Narrow your career search.

___ Talk to recent graduates/alumni about their experiences in areas of interest to you.

SENIOR YEAR

___ Do well academically.

___ Perfect/complete your resume and cover letter(s). Have them quality-controlled and critiqued by the Career Development Center staff.

___ Update your portfolio.

___ Perform mock interviews.

___ Research prospective employers before interviewing. Prepare appropriate questions.

___ Schedule on-campus interviews.

___ Attend and interview at career fairs.

___ Evaluate each interview after completion. What did you learn? What did you do well? What could you do better next time?

___ Use computer job search resources.

___ Read at least two trade publications in your field of interest.

___ Complete applications for graduate school (if applicable).

“An education isn’t how much you have committed to memory, or even how much you know. It’s being able to differentiate between what you know and what you don’t.” Anatole France

The General Education Program

“We are what we repeatedly do. Excellence, then, is not an act but a habit.”  Aristotle
Undergraduate Programs at Ship

Degree framework for undergraduate students:
All degrees awarded by Shippensburg University must be structured to fit the following framework:

- The completion of a minimum of 120 credit hours in the selected curriculum. Students required to complete developmental courses should note that developmental coursework is additive to the 120 credit minimum.
- The completion of all general education courses and the course sequence requirements in the selected curriculum.
- An overall grade point average of at least a 2.0 (“C”) in the total program of courses.
- A cumulative grade point average of at least a 2.0 (“C”) in the major.
- In the case of teacher education students, a satisfactory history of development in student teaching.
- The completion of all final coursework.

Overview: The General Education Program

What is the General Education Program?
The General Education Program at Shippensburg University comprises forty-eight of the credit hours required for graduation.

- All students at the university are required to complete the program.
- The program includes a series of special courses consisting of three parts:
  
  Part 1: Required Skills and Competencies (15 credits)
  Part 2: Categories of Knowledge (33 credits)
  Part 3: Library Skills (completed in College Level Writing course)
  Diversity requirement

Why have a General Education Program at Shippensburg University?
At the core of the curriculum lies the principle that a good education has two distinct purposes. The first of these is to acquire a set of competencies and a grounding in the arts and sciences which promote real intellectual growth in college and ample cultural awareness in the years beyond. The second purpose is to prepare students for a rewarding and socially beneficial vocation by exploring subjects not necessarily available within the confines of a prescribed major.

The program allows students to make personal choices. It also enables the students to satisfy native curiosity, to explore unfamiliar territory, and to cultivate sensitivity toward their environment and an awareness of their personal strengths and weaknesses.
The General Education Program

48 Credits

Part I: Required Skills and Competencies (15 Credits)

_____ Historical Foundations of Global Cultures [students may need to take Reading and Study Skills (RDG050) first]

_____ Thinking Historically in a Global Age

_____ Intro to Human Communication

_____ Writing Intensive First Year Seminar/Advanced Placement Writing [student may need to take Intro to Academic Writing (ENG 113) first]

_____ College-Level Mathematics [students may need to take Developmental Math (MAT 050) and/or an additional prerequisite]

Part II: Categories of Knowledge

Category A—Logic and Numbers for Rational Thinking (1 course – 3 credits)

Category B—Linguistic, Literary, Artistic, & Cultural Traditions (3 courses – 9 credits)

Category C—Biological & Physical Sciences (3 courses – 9 credits)

Category D—Political, Economic, and Geographic Sciences (2 courses – 6 credits)

Category E—Social and Behavioral Sciences (2 courses – 6 credits)

Part III: Additional Requirements

1. Students are required to take one diversity course to graduate. You can meet this requirement by taking a course that double counts as a diversity course and a general education, major, or free elective course.

2. The university is now offering Special Topics in General Education courses as part of the overall General Education Program. Check with your academic advisor to see how these courses may apply to your particular program of study.

*Other language courses as offered may be taken in this category.

All students completing a Bachelor of Arts (B.A.) program will be required to attain a Novice level of proficiency in a foreign language. Novice proficiency may be satisfied by the completion of three years of a foreign language in high school, three credits of intermediate level college coursework in a foreign language, an appropriate AP or CLEP score, or satisfactory completion of an intermediate-level proficiency examination.

Special Topics in General Education, Category C (xxx190)

CHM103 Chemistry: A Cultural Approach
Appropriate only for non-science majors. It discusses some basic ideas of chemistry in a non-mathematical way and shows how chemistry is involved in our lives.

CHM105 Chemistry: An Observational Approach
Is designed for non-science majors who want a laboratory experience. It requires a minimum amount of mathematical reasoning, for example, in determining mass relationships from chemical formulas and equations.

CHM121 Chemical Bonding
First chemistry course for a well prepared science major.
(Prerequisites: MAT 175 or MAT 117 (either may be taken concurrently with CHM 121) or math placement at Level 5 and one year of high school chemistry.)

*NOTE: Students majoring in the biological or physical sciences are permitted to count one course from their major department toward satisfying this requirement. Natural science courses which carry one of the above courses as a prerequisite and required science courses for elementary education majors may also be counted toward this requirement.

Diversity Courses at Shippensburg University

All Shippensburg University students must complete at least one diversity course to graduate. Several of these courses fulfill General Education or major requirements as well. The following courses currently satisfy the diversity requirement:

ART 101\textsuperscript{1} Art Appreciation (Art)
CRJ 452 Race, Ethnicity, and Crime (Criminal Justice)
ECH 460 Family, School, & Community Partnerships in Early Childhood Educ. (Teacher Ed.)
EEC 273 Introduction to Exceptionality (Teacher Ed.)
ENG 248\textsuperscript{2} Introduction to Culturally Diverse Literature of the U.S. (English)
ETH 100 Introduction to Ethnic Studies (Ethnic Studies)
GEO 103\textsuperscript{3} Geography of the U.S. & Canada (Geography/Earth Science)
GEO 140\textsuperscript{4} Cultural Geography (Geography/Earth Science)
HIS 201 US History (History)
HIS 342 Immigration & Ethnicity (History)
SWK 265 Understanding Human Diversity for Social Work Practice (Social Work)
MGT 447 Business & Society (Management & Marketing)
SOC 101\textsuperscript{4} Introduction to Sociology: Society & Diversity (Sociology/Anthropology)
WST 100\textsuperscript{4} Introduction to Women's Studies (Women and Gender Studies)

See your advisor if you have questions on how you can best meet this requirement.

\textsuperscript{1} May fulfill a Category B Humanities requirement.
\textsuperscript{2} May fulfill a Category B Literature requirement.
\textsuperscript{3} May fulfill a Category D requirement.
\textsuperscript{4} May fulfill a Category E requirement.
Tips for Students

Choosing & Using General Education Coursework

The General Education Program helps you explore many different areas of study. But how do you decide which classes you should take? There are many ways. For example, look for a class that

- Is in a subject you have studied before, and you know you will like.
- You know nothing about or is in a discipline with which you are unfamiliar.
- Helps you develop one of your strengths.
- Helps you work on one of your weaknesses.
- Teaches you about cultures (history, political science, art, music, theater, literature, modern languages, women and gender studies, geography).
- Teaches you about social problems (women and gender studies, geography, sociology).
- Is an introductory course for a major you are considering.
- Helps you understand yourself (sociology, psychology, biology, philosophy).
- Helps you understand the physical world around you (geology, biology, geography, chemistry, physics, mathematics).
- Helps you lead a healthier life (biology, sociology, psychology).
- Examines the major institutions of our society (economics, philosophy, political science, public administration, sociology).
- Examines technology and how it works (computer science, chemistry, physics).
- Improves your communication skills (English, human communication, modern languages).
- Teaches you to solve problems (mathematics, philosophy, chemistry).
- Develops your skills in research, organization and critical thinking.

The above suggestions are examples. Your college education will encompass many different disciplines and will help you to make connections between those disciplines. Use this list as a stimulus, and consult your advisor for more information.

Changing the Conversation

We develop our understanding of minorities not only through interpersonal experiences but also through cultural practices and information handed down to us by outside sources.

• White privilege does not deny people access to conversations about race.
• All people can use their individual perspectives to advocate for dialogue and improved race relations.
• Try to understand white privilege. Own your privilege as a way to understand the role it plays in how you understand race.

Active dialogue will undoubtedly lead to improved race relations. It’s time to pull together, using all of our voices to improve race relations. By uncovering the ignorance that exists within each of us, racism will lose its momentum as a force that shapes and harms our nation’s history.

** May also count as part of Category B in General Education.
## B.A. students must satisfy the Novice level competency in a foreign language. This is accomplished via 3 years of the same language in high school, an AP score of at least 2, or the completion of a 103 level course. Three credits of a foreign language may count under category B.

PAPA examinations
*** All education majors must pass the first level of the PAPA assessments in reading, math, and writing between 48 and 60 credits of coursework. These basic skills tests must be passed before students are permitted to take any 300 level or above education course.

Students that were not accepted into the University as Art Education majors must apply for professional standing through the Art Department, where a Change of Major is required.

Also Required:
___ Portfolio Review
___ Yearly Student Art Exhibit
___ Senior Exhibit

Students lacking strong chemistry/math backgrounds should consider taking CHM 105: Chemistry: An Observational Approach. Physics is normally taken in the junior year.

Environmental Education Certificate is available may teach any subject matter labeled as environmental education for grades K-12. Requires 24 credits — See the department for details.

**All education majors must pass the first level of the PAPA assessments in reading, math, and writing between 48 and 60 credits of coursework. These basic skills tests must be passed before students are permitted to take any 300 level or above education course.**

American Chemical Society Certification available.

See Department Chair for details.

**All education majors must pass the first level of the PAPA assessments in reading, math, and writing between 48 and 60 credits of coursework. These basic skills tests must be passed before students are permitted to take any 300 level or above education course.**

All chemistry majors will take a comprehensive examination in their junior year at a time and place designated by the department. A satisfactory performance in all areas of this examination is a requirement for departmental recommendation and ACS certification.

## B.A. students must satisfy the Novice level competency in a foreign language. This is accomplished via 3 years of the same language in high school, an AP score of at least 2, or the completion of a 105 level course. Three credits of a foreign language may count under category B.

III. Library Skills Completed via College/Advanced Writing course

IV. Communications/Journalism Major

   NOTE: Students take 42 credits to complete the major.

   Communications/Journalism Core 15 cr
   Students must complete the following core courses with "C" grades or better before taking any other Comm/Journ course:
   - COM 111 Introduction to Mass Communication (3 cr)
   - COM 112 Media Writing (3 cr)
   Students in the program need appropriate prerequisites and class standing before taking advanced Comm/Journ courses.
   - COM 245 Diversity & the Media (3 cr)
   - COM 345 Communication Law and Ethics (3 cr) Jr./Sr. standing
   - COM 355 Comm/Journ. Professional Practicum (3 cr) Jr. standing
     (prereq. COM 201 & 241, or 285 & 293, or 224 & 284)

   Professional Emphasis 12 credits in one of the following areas: 12 cr

   Electronic Media
   - COM 224 Electronic Media Writing (3 cr)
   - COM 284 Electronic Media Basic Production (3 cr)
   - COM 424 Electronic Media Producing & Performance (3 cr)
     (Prereq: COM 284 & COM 224)
   - COM 484 Electronic Media Programming & Management (3 cr)

   Print and Online Media
   - COM 285 News Writing & Reporting (3 cr)
   - COM 293 Editing (3 cr)
   - COM 375 Public Affairs Reporting (3 cr) (Prereq: COM 285)
   - COM 478 Digital Journalism (3 cr)
     (Prereq: COM 285; 393; 355) (Spr only)

   Public Relations
   - COM 201 Principles of Public Relations (3 cr)
   - COM 241 Public Relations Writing (3 cr)
   - COM 381 Promotional Publication Design (3 cr)
   - COM 432 Public Relations Research & Campaigns (3 cr)
     (Prereq COM 201; 241; 201; 355) (Sprn only)

   Communications/Journalism Electives 15 cr
   Students will choose from 6 -12 credits to complete their major.
   Choose courses from the other Professional Emphases and from the courses below:
   - COM 290 Advertising Copywriting (3 cr)
   - COM 305 Sports Journalism (3 cr) (prereq. COM 245)
   - COM 335 Media Advertising & Sales (3 cr)
   - COM 360 Basic Digital Photographic Communication (3 cr)
   - COM 362 Photojournalism (3 cr)

   The following courses require junior or senior status:
   - COM 395 Internship I (3 cr) (Dept. permission; overall GPA=2.5 &
     Major GPA=3.0)
   - COM 410 Women & the Media (3 cr)
   - COM 425 Feature Writing (3 cr)
   - COM 451 Electronic Field Productions (3 cr) (Prereq. COM 224; 284)

   These courses can be from any academic area outside of Comm/Journ.

   Total Graduation Requirements 120 cr
   

   GPA Needed to Declare: 2.3

HELPFUL HINTS FOR ADVISING:

Semester I
   COM 111 Introduction to Mass Communication
   Semester II
   COM 112 Media Writing

As part of the COM 112: Media Writing course, a grammar/style proficiency exam is given to all students. This exam must be passed with a score of 70 or better to pass the course and stay in the major/minor. Students are permitted to take the exam no more than two times. COM 112 must be taken at SU.

Only current majors or minors may schedule Comm/Journ courses without departmental permission.

Above average writing skills are needed in this major and students are highly encouraged to take courses that will enhance these skills.

A professional internship is strongly recommended. One to three internship credits may be scheduled by qualified juniors or seniors who meet the department standards and who have obtained written approval from the department internship coordinator. Each internship credit is equivalent to 40 hours of work on-site.

Only 12 credits of transfer credit may be counted as part of the major.

A Comm/Journ minor is available 18 cr. NOTE: This department does not permit any transfer courses to be counted in the minor.

  frequency of required courses.

Total Graduation Requirements 120 cr

GPA Needed to Declare: 2.0

To declare this major, a student must be at a minimum math placement level of
6.

Students should be advised that this program is academically challenging.
Significant effort outside of class, self-discipline, and commitment to
completing tasks will be crucial for student success.

Students pursuing this major should be very strong academically, have strong
math, logic, and reasoning skills; and a background in science.

ENGLISH – SECONDARY EDUCATION CERTIFICATION – B.A.##

(continued)

Total Graduation Requirements: 120 cr
GPA Needed to Declare: 3.0

HELPFUL HINTS FOR ADVISING:

Take ENG 130 and ENG 213, Literary Studies for the English Major & Minor, and Writing and Research about Literature, before taking upper level courses.

NOTE: ENG 130 is only offered in the fall.

Semester II: ENG 213 and may take one additional 200-level course.

NOTE: ENG 213 is only offered in the spring.

300-level courses should NOT be taken in the first 2 semesters.

A literature course taken to satisfy the Gen. Ed. Category B requirement does NOT double count for the English major or the English minor.

An English minor is available — 18 credits.

HELPFUL HINTS FOR ADVISING:

Year 1 Any introductory language courses necessary.

Students planning to teach French will find it to their advantage to work for dual certification in two modern languages, a modern language and English, or a modern language and another field. To achieve dual certification, a student must have the approval of both departments involved, follow an approved course of studies in the specialty areas, take the appropriate methods course, and complete student teaching in both fields. See the Modern Languages Department for details.

All French Secondary Education Certification B. A student must pass the ACTFL Oral Proficiency Interview prior to graduation and reach an advanced low level minimum.

** All education majors must pass the first level of the PAPA assessments in reading, math, and writing between 48 and 60 credits of coursework. These basic skills tests must be passed before students are permitted to take any 300 level or above education course.

A French minor is available 18 credits.

## B.A. students must satisfy the Novice level competency in a foreign
language. This is accomplished via 3 years of the same language in high
school, an AP score of at least 2, or the completion of a 103 level course.
Three credits of a foreign language may count under category B.

All students completing a Bachelor of Arts degree are required to attain
proficiency in a foreign language. Proficiency may be satisfied by completing
a language class at the 103 (intermediate) Level or three years of any one
foreign language in high school. Students may also meet this requirement
through AP or CLEP testing. Three credits of a foreign language may count
under Category B.
In addition to the required core, students must take courses in four applied competency areas. To meet this requirement students need 9-15 credits, depending on whether a course counts for more than one applied competency.

**HELPFUL HINTS FOR ADVISING:**

**YEAR 1**
- PLS 100 U.S. Government and Politics

**YEAR 2**
- PLS 271 Introduction to Public Administration
- MAT 117 Applied Statistics

PLS 271 and MAT 117 are prerequisites for PLS 301
PLS 301 is a prerequisite for PLS 302
PLS 302 is only offered during the Spring semester.

Students are strongly encouraged to complete an internship.

A student may count a maximum of six internship credits toward the Major.
To qualify for an internship, students must have a 2.0 overall GPA and a 2.3 in
the Public Administration major. Students must have completed the following
courses to be eligible for an internship: PLS 100, PLS 202, PLS 231, PLS 271,
PLS 300, and PLS 301.

PLS 395 and 396 are prerequisites for PLS 301
PLS 301 is a prerequisite for PLS 302
PLS 302 is only offered during the Spring semester.

**HELPFUL HINTS FOR ADVISING:**

### YEAR I

Any introductory language courses necessary

Students planning to teach Spanish will find it to their advantage to work for dual certification in two modern languages, a modern language and English, or a modern language and another field. To achieve dual certification, a student must have the approval of both departments involved, follow an approved course of studies in the specialty areas, take the appropriate methods course, and complete student teaching in both fields.

See the Modern Languages Department for details.

All Spanish & Spanish Secondary Education Certification B.A. students must pass the ACTFL Oral Proficiency Interview prior to graduation and reach the advanced low level minimum.

*** All education majors must pass the first level of the PAPA assessments in reading, math, and writing between 48 and 60 credits of coursework. These basic skills tests must be passed before students are permitted to take any 300 level or above education course.

Teacher Education:  Early Childhood/Elementary Education PK-4
                   Elementary/Middle School Education 4-8
                   Elementary/Middle School Education 4-8/Special Education Dual Certification
Many individuals have found that they enjoy working with children or young adults through babysitting, summer camps, athletics, etc. and then decide that they would like to teach these age groups. This enjoyment and appreciation of youth is a basic necessity for a teacher but as one educator said, “You can't teach what you don't know.” Therefore, the teacher education program for either early childhood/elementary education (Grades PK-4, Special Education PK-4 Dual Education Majors) or elementary/middle level education (Grades 4-8) majors is a blend of practical experiences with children grounded in a solid academic background in the general education program and in the major. If you, as an exploratory student, are considering one of these majors, it must be a sound decision based on the understanding that you will be teaching children and young adults to take their places in society in the 21st century. You will need to: be a literate individual, knowledgeable in the math, sciences, social sciences and humanities; hone/sharpen critical and creative thinking skills, problem solving skills; have an appreciation of multicultural and international perspectives; and have an understanding of special needs children in inclusive classrooms in order to fulfill your responsibility to the children you teach.

All three programs at Shippensburg consist of a four-year program leading to the degree of Bachelor of Science in Education. Successful completion of this program of study qualifies the graduate for a variety of professional employment possibilities. The PK-4 Early Childhood/Elementary program leads to a PK-4 teaching certificate, thus qualifying the graduate for employment in any level pre-kindergarten through fourth grade. The dual Special Education/ PK-4 program leads to both PK-4 and special education certification. Those students choosing the Elementary/Middle Level program will select either one or two subjects in which they will be certified for the fourth through eighth grade level. The subject areas are: Social Studies, Language Arts, Math or Science. If a student selects the option to be certified in two subjects, one of the subjects must be math or science.

The curriculum for the programs can be divided into two parts: first, the university's General Education requirements; and secondly, the education certification course requirement which focus on the particular grade band that a student will be certified to teach. Students must successfully complete the PAPA by a designated point before being permitted to continue, and complete required coursework with grades of “C” or higher. They must also have a 3.0 grade point average before gaining entry into either program. Students need to demonstrate initiative, patience, and empathy for children as they learn to plan and guide the child’s program and to observe the child’s application of skills and knowledge. Their program emphasizes knowing how and when to help the child learn using a reflective model of teaching. Through study, direct observation, and participation, students grow in understanding various methods of teaching and become skillful in the use of curriculum materials and specialized equipment. They critically examine various courses of study and the newer techniques of measuring and assessing children's social and academic growth.

Hockersmith, P.E., School of Education and Human Services, June 2005.

Updated: Royce, C., Teacher Education, Shippensburg University, July, 2009.
Entry Requirements for Teacher Education

For admission into one of the program areas in the Department of Teacher Education:

1. Obtain an application at Shippen Hall 214 during the first week of the semester.
2. Complete and submit the application during the first two weeks of the semester.
3. Data used in the selection process include: your completed application form which includes a Statement of Commitment, high school and college GPA.
4. If you are selected, you will be notified prior to scheduling so that you can select appropriate courses.

**Required:** a minimum 3.0 GPA from Shippensburg prior to completing the application.

**Suggestions:** Have an academic advisor read the Statement prior to submitting the application.

**Academic Advising**

**Students Interested in Secondary Teaching Profession**

(i.e. Art, Biology, Chemistry, Earth Science, English, French, Math, Physics, Social Studies (history, geography, economics or political science) or Spanish)

Any exploratory student interested in teaching grades 7 through 12 or K-12 in public schools must be certified to teach those grades. Shippensburg University has no Secondary Education Department. All students interested in teaching in a specific discipline must apply directly to the department as the degree will be a degree in the subject area with certification added.

Most secondary programs can be completed in 4 years. In situations where a student wants to complete requirements for more than one certification area, an additional semester may be needed. Field work beginning in the first education course (American School) and additional department requirements must be completed. All secondary majors must achieve a B average by graduation in order to be certified in the state of Pennsylvania.

Entry Requirements for all education majors:

1. A minimum 3.0 Grade Point Average.
2. Declare at the beginning of each semester.
3. Discuss the major with education professors who teach the secondary methods courses.

**Suggestions:** Contact the College of Education and Human Services at 477-1487 if you have questions regarding secondary programs.

Total Graduation Requirements 120 cr

GPA Needed to Declare: 2.75

Admission to this major is competitive. Students must have earned a grade of "C" or better in Principles of Biology 161 or 162 or BIO 237 and must have a 2.75 GPA.

Students are eligible for a Biology minor. See department for specifics.

*Fulfills University diversity requirements

Helpful Hints for Advising:

Students should begin their Biology sequence in the freshman year and must take 16 credits each semester during the freshman year.

Physics can be taken in the junior year.

Internship should be taken during the spring or summer semester of the senior year.

Any student may enroll and complete any course in the Department of Exercise Science. Prerequisites for any course must be complete prior to enrollment. Students may complete no more than 3 Exercise Science major courses within the Department of Exercise Science without admission into the Exercise Science major.

* Students not planning to study at the graduate level may take BIO 237 and 238 instead of the 16 credit sequence (BIO 161, 162, 371, 350).

Admission to this major is competitive.

Students are considered for admission to Early Childhood Education (PK-4) during the first two weeks of each semester. Students are ranked by several factors including educational philosophy, current GPA, interview, a writing sample, and grades in certain classes. An application requesting admission to the department is the first step in the application procedure. See “Admission to Elementary Education” for details. Students who plan to major in Early Childhood Education (PK-4) should maintain close contact with the department to insure that they meet program requirements.

**GPA Needed to Declare 3.0**

Students are considered for admission to Teacher Education during the first two weeks of each semester. Students are ranked by several factors including educational philosophy, current GPA, interview, a writing sample, and grades in certain classes. An application requesting admission to the department is the first step in the application procedure. See “Admission to Teacher Education” for details.

Students electing certain minors can be required to complete more credits to complete both the elementary program and the requirements of the select minor. All students are required to complete at least 120 credit hours for graduation. The final responsibility for scheduling and fulfilling program requirements belongs to the student. Majors failing to maintain department required GPA of 3.0 will not be permitted to schedule elementary courses until they have reached the required GPA.

Students who plan to major in Teacher Education should maintain close contact with the department to ensure that they meet program requirements.

The Business Administration-General option is designed for students entering the John L. Grove College of Business who are undecided about choosing a specific B.S.B.A. major. Since the coursework in the B.S.B.A. degree program is basically the same for all majors through the sophomore year, this undecided option provides students with up to two years before declaring a specific major in the College of Business. You are encouraged to declare a major sooner than your junior year. At any given time, admission to specific majors may be limited.

If you have any questions about this program, call the College of Business at 717-477-1620.
