

Mathematics

18-21 credits needed for Minor

Contact the Mathematics Dept., MCT 250

The Mathematics Minor consists of six courses. All six courses must be at or above the 200 level, and at least two of the courses must be at or above the 300 level. *(There is one exception: MAT 181 may be taken in place of MAT 211 for credit toward the minor; however, doing so may restrict your access to some upper-level courses.)*
