

HOW TO PROTECT YOURSELF AND YOUR ROOMMATES FROM BED BUGS

In the past ten years bed bugs have become a serious pest in the US. Bed bugs, like mosquitoes, are insects that feed on blood. Bed bugs live in the home, especially in and around the bed, and usually bite at night when people are sleeping. They will feed at any time of day if necessary. Bed bugs have three main stages of life, the egg, the young and the adult. Young bed bugs can vary in size from poppy seed to sesame seed, and adults can be as big as an apple seed. All are tan or brownish-red in color.

The first sign of bed bugs is usually a group of bites. If you experience bites, look for bed bugs in your bed or where you have slept recently. Have you been outside in warm weather? They could be mosquito or flea bites or something else. Everyone reacts differently to bed bug bites. Some people don't react at all, and others develop itchy lumps.

Fast Facts about Bed Bugs

Bed bugs:

- Do not transmit diseases to people
- May trigger asthma
- Cannot fly or jump, but can run fast
- Are large enough to be seen
- Can be transported in personal belongings

Bed bugs are very flat and can hide in very small spaces

Where to Look for Bed Bugs

- Check the sheets, pillows and blankets for stains.
- Look under the mattress and pillows.
- Check the seams and puckers of the mattress and box spring.
- Look at the bed frame for bugs and stains.
- Check the floor and moldings.
- Look inside and underneath drawers.
- Radios, phones, clocks near the bed or on a nightstand may also be hiding places for bed bugs.
- Don't panic, bed bugs are not life threatening.
- Call your building manager, landlord or residence director immediately if you think there may be bed bugs in your room or bed.
- Follow all instructions given to you.
- Wash and dry your clothing and bedding on hot. 30 minutes of heat kills bugs and their eggs.
- Wash donated clothing before wearing.
- Do not take furniture or items from the street, they may have bed bugs.
- Do not try to use pesticides on your own.
- "Bug bombs" are not effective for bed bugs.
- Talk to others about it; bed bugs are common today in all types of housing. Everyone should be aware.
- Cooperate with those trying to help you.
