Heartland Hospice is an organization that provides a unique type of care to patients with a limited life expectancy & to their loved ones. Hospice emphasizes quality rather than length of life. Volunteers play a vital role in our organization & are rewarded with the kind of gratification that comes from helping others. Heartland trains volunteers to spend time with hospice patients. Most of the time spent with patients is done in the context of friendly visiting. They also welcome volunteers to help in the hospice office with answering the phones, filing, photocopying, faxing, etc.
