

Finding Network Information

1) Open a command prompt

- Start -> All Programs -> Accessories -> Command Prompt

2) At the command line type "ipconfig /all" (without the quotes).

3) This will bring up all info for your PC network connections.

- Included will be "Wireless LAN adapter Wireless Network Connection" and "Ethernet adapter Local Area Connection".
- Each of these will include an "IPv4 Address" (a.k.a. IP address) and "Physical Address" (a.k.a. MAC Address).
