

# How to find the Computer Name

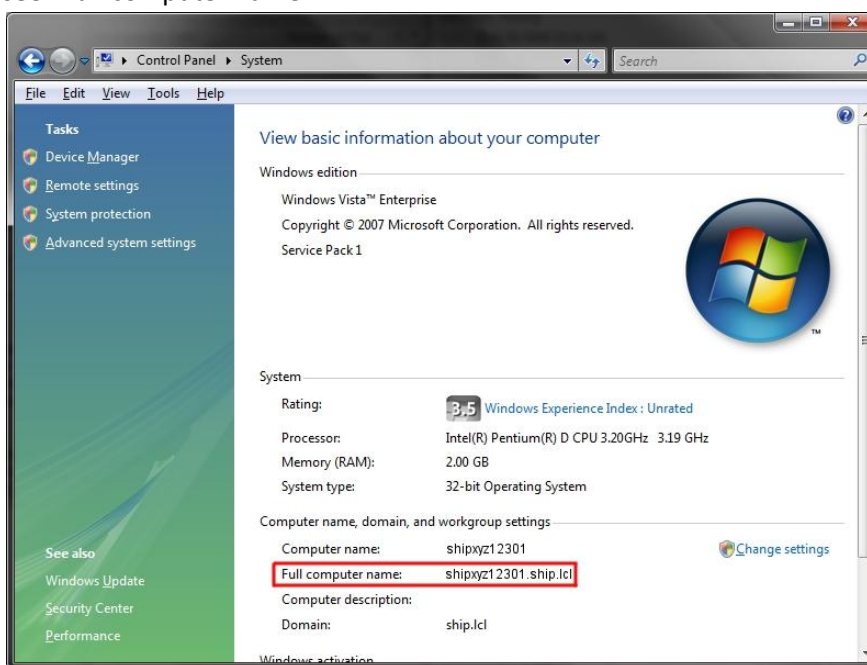

## Windows Vista:

- 1) Right click the "Computer" icon on your desktop.
  - If this icon is not on your desktop, you may find Computer from the Start Menu.
- 2) Select "Properties"

- 3) On the System Properties window under "Computer name, domain, and workgroup settings" you should see "Full computer name"

## Windows XP:

- 1) Right click the "Computer" icon on your desktop.
  - If this icon is not on your desktop, you may find My Computer from the Start Menu.
- 2) Select "Properties"

- 3) On the System Properties window, click the "Computer Name" tab at the top.
- 4) The computer name is listed next to "Full Computer Name".
