The Education Edge

Did You Know?: TK 20 Orientation

It's touted as D2L, but what is it really? Prior to student teaching, pre-service education majors are required to activate their TK20 account. The Department of Teacher Education partners with enterprise management company to TK20 to provide faculty, students, and cooperating teachers with a software system that is essentially a one-stop-shop for assessment, planning, and reporting. For those who are unfamiliar with TK20, it may sound mysterious or too good to be true, but Dr. Christopher Keys provided information to help others become familiar with this program.

1. What is TK20 and what can you tell us about it?
   TK20 is a data collection and management system that the Department of Teacher Education requires undergraduate education students to purchase during their first education class. Students upload key assignments, and faculty use a rubric to assess the student’s growth and impact on learning objectives. This software can create and store the student’s coursework in an electronic gallery. Student teachers can track their progress through assessments uploaded by cooperating teachers. The program has the capability for students to create and store an electronic portfolio as well as other services for faculty.

2. Why is it important?
   Standardization. All teacher education faculty and students are using TK20. All teachers in the field are using this computer system to assess student teachers; and it meets the standards for accreditation through NCATE. TK20 is a user-friendly program which includes an online tutorial for new users. The price to purchase a student account is reasonable, at $100.00, and is good for up to 10 years.

3. Any other important facts or information students need to know about TK20?
   For students, buy it early in the semester. Typically, sophomores are introduced to TK20 in their first education class where it is mentioned in the syllabus and discussed by the professor as a requirement. For additional questions regarding TK20, please contact system administrator Dr. Herbert Steffy at 717-477-1487 or email HSteffy@ship.edu.

KSRA President, Kaitlyn Erb

Keystone State Reading Association (KSRA) President, Kaitlyn Erb, is a junior PreK-4 Education major expected to graduate May 2016. As club president, Kaitlyn’s responsibilities include working collaboratively with the executive board and voting on events suggested by club members. She explains that the executive board members do not have specific titles; rather, they all work as a team to lead the club in its success. Kaitlyn has been involved with KSRA since Fall 2014 and quickly moved up the ranks to become President in her 2nd semester. She joined KSRA to gain more professional development and research-based applications. Aside from her duties as President, she enjoys running, meeting new people, working with children, and being outdoors. KSRA actively reaches out to Grace B. Luhrs University Elementary School students to promote literacy. In the Spring 2015 semester, they are hosting a writing workshop and have invited Debbie Urso to speak about active engagement. For more information about KSRA, upcoming events, and how to become involved visit their Facebook page (KSRA Shippensburg), Instagram (KSRAShippensburg), or email KSRA@gmail.com.

Student Clubs

Shippensburg University Capital Area Association for the Education of Young Children (SU CAAEYC)

SU CAAEYC is an organization dedicated to furthering the understanding of young children and their families. Membership is open to any student at SU, but especially to those in fields related to children’s development, education, and care.

Bridge for Kids (BFK)

BFK is open to any student enrolled at Shippensburg University. The organization is actively involved in providing members with service opportunities in schools, communities, and through work with agencies. Members also participate in advocacy efforts to improve funding for public schools to ensure adequate government funding for programs that benefit children.

Student Clubs

Shippensburg University State Education Association (SUPSEA)

SUPSEA is focused on improving conditions of teacher preparation on campus and in our community. The club hopes to establish a strong commitment toward quality education for pre-professionals interested in Teaching Education at SU. For more information, check out the SUPSEA bulletin board in Shippen Hall.
PSTA Conference 2014

On December 4, a group of Shippensburg University Students attended the Pennsylvania Science Teachers Association Conference. The students were accompanied by Dr. Christine Royce and had all been enrolled in the Fall section of the Teaching Science in Middle School course. Students volunteered at the conference and attended various sessions on relevant science topics as well as presented. Sessions covered science topics for K-12 levels. The students who presented were asked to design an activity that they would be able to demonstrate with a “Make-And-Take” aspect. Amanda Schwarz said, “I enjoyed the PSTA conference because I was able to meet with distinguished teachers to discuss science education in Pennsylvania. I also presented an activity on watersheds at a Make-And-Take session and received great feedback from all of the participants. Overall, it was definitely a fantastic experience, and I would highly recommend it to those looking for fun, interactive professional development opportunities.”

KDP President, Abby Brumback

Kappa Delta Pi (KDP) is an International Honors Society in Education. Chapter President, Abigail Brumback, is an English/Secondary Education major graduating May 2015. Currently, in her student teaching placement in a 7th grade classroom in Harrisburg, she has always dreamed of teaching in an urban school district. “Shipensburg has made that happen for me,” she says. “My journey begins in Harrisburg.”

Abigail is a member of the University swim team, enjoys spending time with her roommates, traveling, and considers herself a “loaded-french-fry connoisseur.” She joined KDP for the opportunity to become involved in an honors society, but gained much more upon induction. The professional development she has added to her knowledge of teaching has already been useful to her while student teaching. Furthermore, she enjoys the community of teachers to socialize, communicate with, and networking prospects since its induction in Fall 2013. As President, Abigail is responsible for running meetings and initiatives as well as keeping minutes and corresponding with members through email. She checks in with her executive board to ensure they are progressing with projects, but allows them autonomy. Abigail is also who obtains GPA’s of potential candidates and answers questions of prospective members.

Throughout the Spring 2015 semester, KDP will be spending several Monday’s at Kings Kettle, a local food bank, and be hosting a book drive. The club is continually seeking professional development opportunities as well as interested candidates to speak at initiatives.

For more information about the Epislon Epsilon chapter of Kappa Delta Pi, visit their Facebook page (www.facebook.com/shipkdp), or email ShipKDP@yahoo.com.

Student Clubs - Continued

Keystone State Reading Association (KSRA)

KSRA, an affiliate of the International Reading Association (IRA), is a state association of individuals engaged in reading instruction, literary development, and the encouragement of lifelong reading habits. KSRA believes in the importance of collaborating with other reading educators to achieve its purpose and goal. Their mission is to promote literacy, provide instructional leadership, support professional development, and advocate literary issues. KSRA is open to undergraduate and graduate education majors, especially reading minors and graduate reading students.

Collegiate Middle Level Association (CMLA)

Collegiate Middle Level Association welcomes all students who will teach in a middle level grade (4-8). Students in ProK-4, 4-8, and secondary teacher certification programs are welcome to join CMLA. Benefits of becoming a member include making friends, serving others, getting connected with professionals in the field of education, and the ability to have access to all the professional resources of CMLA. CMLA strongly recommends that freshmen and sophomores become members and get connected!

Kappa Delta Pi (KDP) is dedicated to scholarship and excellence in education. The society was founded in 1911 and has a long history of openness to gender, race, ethnicity, disability, and a wide variety of intellectual ideas. KDP promotes the development and dissemination of worthy educational ideas and practices, enhances the continuous growth and leadership of its diverse membership, fosters inquiry and reflection on significant educational issues, and maintains a high degree of professional fellowship.

CMLA President, Samantha Sabol

Samantha Sabol, president of Collegiate Middle Level Association (CMLA), is a sophomore Mid Level Education Math and Language Arts major expected to graduate May 2017. She has been involved in CMLA for 2 semesters and has taken over the role of president while also being a member of the University’s swim team and maintaining her 3.0 GPA requirements. In her free time, Samantha plays the guitar and enjoys volunteering with the Special Olympics. Actively grabbing the reins of her role in CMLA, Samantha is supervising the club by organizing executive board meetings, brainstorming fresh ideas for engaging her members, and assisting members with planning and implementing seminars. She explains that the club’s executive board is young, all sophomores, and they are working hard to bring the club to a new level.

Opportunities for professional development and attending national conferences were among the reasons Samantha joined CMLA in Fall 2014. “We try to host events that all education majors will benefit from, not just the Mid Level students. For example, we have invited Superintendent Beth Bender of the Shippensburg Area School District to discuss the new hiring process,” said Samantha. The club is holding its first Earth Day event on March 31, for the 5th grade students at Grace B. Luhrs Elementary School where university students who are currently student teaching will teach lessons about Earth Day. CMLA is asking for volunteers throughout the entire education department to help on the day of the event.

In conjunction with the Earth Day event, the club is having a fundraiser at Chipotle Mexican Grill on 4th Avenue and Main Street. Help support CMLA by stopping by on March 31, between 4:00-8:00pm. The staff has agreed to donate a portion of each item purchased during that time back to the club!

Faculty Feature - Dr. Christopher Keyes

It may come as a surprise that this assistant professor of the Department of Teacher Education said that he did not always want to be a teacher. In fact, he entered the University of Utah majoring in architecture. Finding it was not a good fit, he decided to become a history teacher with a concentration in Spanish. He put his ESL certification to good use teaching English as a second language to middle school students in West Valley City for seven years. It was then, while watching his ESL students struggle with reading, that inspired him to pursue a master’s degree in reading at Westminster College. Dr. Keyes credits his wife for encouraging him to think about a doctorate program, as he felt limited in employment opportunities in Utah. Excited to find that he was accepted at Vanderbilt University, which was ranked number one. Keyes made a calculated move in relocating to Nashville, Tennessee, so he could focus his goals on bilingualism, and teacher development. After graduation, he sought employment at a teaching university in a small town and found that Shippensburg University was one of only three matches. Although he enjoyed his time in the south, Dr. Keyes said that the biggest draw for him was the lab school, which gave him the opportunity to observe and understand firsthand what teaching has already been useful to her while student teaching. Furthermore, she enjoys the community of teachers to socialize, communicate with, and networking prospects since its induction in Fall 2013. As President, Abigail is responsible for running meetings and initiatives as well as keeping minutes and corresponding with members through email. She checks in with her executive board to ensure they are progressing with projects, but allows them autonomy. Abigail is also who obtains GPA’s of potential candidates and answers questions of prospective members.

Kappa Delta Pi (KDP) and an International Honors Society in Education

Kappa Delta Pi is dedicated to scholarship and excellence in education. The society was founded in 1911 and has a long history of openness to gender, race, ethnicity, disability, and a wide variety of intellectual ideas. KDP promotes the development and dissemination of worthy educational ideas and practices, enhances the continuous growth and leadership of its diverse membership, fosters inquiry and reflection on significant educational issues, and maintains a high degree of professional fellowship.

It may come as a surprise that this assistant professor of the Department of Teacher Education said that he did not always want to be a teacher. In fact, he entered the University of Utah majoring in architecture. Finding it was not a good fit, he decided to become a history teacher with a concentration in Spanish. He put his ESL certification to good use teaching English as a second language to middle school students in West Valley City for seven years. It was then, while watching his ESL students struggle with reading, that inspired him to pursue a master’s degree in reading at Westminster College. Dr. Keyes credits his wife for encouraging him to think about a doctorate program, as he felt limited in employment opportunities in Utah. Excited to find that he was accepted at Van- derbilt University, which was also ranked number one. Keyes made a calculated move in relocating to Nash- ville, Tennessee, so he could focus his studies on literacy, bilingualism, and teacher development. After graduation, he sought employment at a teach- ing university in a small town and found that Shippensburg University was a great match. Although he enjoyed his time in the south, Dr. Keyes said that the biggest draw for him was the lab school, which gave him com- fort knowing his children were studying right down the hall from his office. As a “big fan in a small pond,” he presented at two national conferences (AERA and LRA), and he has been published five times in the past two and half years. Committed to advancing educational opportunities for bilin- gual learners, his next big initiative is starting up a K-12 ESL certification program at Ship. Already working on the syllabi, Keyes anticipates this program will open to students as early as 2016. When this busy father of three gets a little down time, he enjoys kayaking, mountain biking, and rock climbing. Describing himself as an “awesome cook,” he likes making Almond Mole Tacos and Puntas de Fletas la Nortena. With the flexibility in his schedule and the support he gets from the administration at this teaching campus, Dr. Keyes is commit- ted to developing his own little niche working behind the scenes to prepare teachers of the future.

CMLA President, Samantha Sabol

Samantha Sabol, president of Collegiate Middle Level Association (CMLA), is a sophomore Mid Level Education Math and Language Arts major expected to graduate May 2017. She has been involved in CMLA for 2 semesters and has taken over the role of president while also being a member of the University’s swim team and maintaining her 3.0 GPA requirements.
