

## MASTER OF SCIENCE

# Applied Psychology (MS)

COURSES 100% ONLINE

## Advance your career in psychology

Shippensburg University's Master of Science in Applied Psychology (MS) emphasizes the application of psychological principles and methodologies to real world problems, helping students achieve career advancement, train for new career paths, or prepare for doctoral study.

### OUR PROGRAM

The 30-credit master's degree in applied psychology is completely online and delivered in an accelerated format, meaning students can finish in one year of full-time study or two years of part-time study. The program's flexible nature and part-time accessibility make it ideal for candidates who already have busy schedules. The curriculum combines a sequence of required courses in research methodology, psychology courses with an applied emphasis across a variety of content areas, electives, and a capstone course. Graduates go on to pursue careers in business, government, health and human services, and education.

### CAREER PATHS

- Survey researcher
- Behavior consultant
- Behavior specialist
- Data analyst
- Technical writer
- Human resource manager
- Healthcare administrator
- Higher education administrator

"I chose Ship for grad school partly because I did my undergrad here and I loved the faculty, and had a great experience. I also chose it because the program is online, and it only takes a year. When I compared it to other grad programs, they just weren't as appealing. I feel this one allows you to still start a life (or continue one, I'm only 22 so I'm just starting), and build a foundation to use the degree while earning it."
