

Recommended Dell Laptop + Docking Monitor

Shippensburg University

**** To purchase, please contact Jamie Rhine (x1260 or jtrhin@ship.edu) for a quote ****

To meet the demands of a more mobile workforce, Technology Services is now recommending that departments consider purchasing a **laptop + docking monitor** instead of desktop computers. Not only is this more economical than purchasing a desktop and laptop computer separately, but it allows for greater flexibility with remote work, on campus meetings, and any other on-the-go needs.

When the laptop is on the desk and connected via a single USB-C cable, it works exactly like a desktop computer. You have the flexibility to work with a full-size keyboard and mouse, webcam, speakers (built into monitor), and any other traditional accessories. When needed on the go, simply unplug the USB-C cable and take the laptop with you. All your active running programs and software is available as it was when the computer was “docked”.

*** Note that this setup supports two monitors, in addition to the laptop screen, whenever docked. See example below. The laptop’s display can be used as a third screen if desired, or can be closed when docked.*
